About Me

As an experienced Front-end and Mobile Developer with over three years of development experience, I possess expert knowledge of web and mobile technologies as well as familiarity with Figma, databases, Git & GitHub, React, and AWS, REST APIs. I am committed to staying up-to-date with the latest industry terminology, concepts, and best practices. My extensive experience in developing responsive applications has equipped me with the skills and expertise to deliver high-quality solutions that are optimized for speed, scalability, and performance. I have strong attention to detail and a grasp of Agile methodologies, which enables me to work collaboratively with cross-functional teams to ensure that project goals are met.

With excellent troubleshooting and communication skills, I am confident in my ability to exceed expectations and deliver exceptional results. I am excited about the opportunity to join teams to bring innovative ideas to life and help deliver multiple projects, while continuously learning and improving my skills. If you're seeking a dedicated and skilled developer, I encourage you to contact me.

Work Experience

Software Engineering Instructor
Fortesoft (NIIT Franchise partner)
August 2021 to October 2022

- Delivered hands-on mobile development, web development, and Java training to students in a classroom setting, resulting in a 95% satisfaction rate from students and the institution.
- Designed and developed engaging course materials and curriculum that effectively convey complex technical concepts to students with diverse skill levels
- Provided personalized feedback and guidance to students, leading to a 60% improvement in overall performance and understanding of the material
- Assessed students' progress through regular assessments and projects, enabling accurate tracking of student learning and facilitating effective course adjustments
- Fostered a collaborative learning environment by encouraging teamwork and communication, resulting in improved problem-solving skills and overall confidence in students
- Stayed up-to-date with industry trends and best practices, ensuring students received the most relevant and current training to prepare them for future career opportunities better.

Web and Mobile Developer (Freelance)
2021 to present

- Demonstrated technical expertise in both Java and Swift, implementing clean and efficient code to deliver projects on time and on-budget
- Collaborated with clients to understand their needs, provide project updates, and overcome technical challenges
- Conducted extensive testing and debugging of applications to ensure compatibility and performance on a wide range of devices
- Stayed up-to-date with the latest mobile and web development trends and technologies, enhancing the quality and efficiency of all projects.
- Designed, developed, and tested various websites and web applications for clients, providing high-quality and user-friendly user experiences
- Demonstrated expertise in web development using HTML, CSS, and JavaScript, utilizing modern front-end frameworks such as React
- Conducted extensive testing and debugging of applications to ensure compatibility and performance on different browsers and devices.

Work Experience

Computer Support Specialist
AZ TECHNOLOGY
September 2017 to June 2021

- Provided technical support and assistance to clients for a wide range of hardware and software issues, resulting in improved customer satisfaction
- Diagnosed and resolved technical problems, including hardware and software issues, network connectivity, and security issues, in a timely and effective manner
- Installed, configured, and maintained various hardware and software components, including operating systems, applications, and security software, to meet client needs
- Implemented effective security measures, such as anti-virus software and firewalls, to protect client systems against cyber threats
- Collaborated with cross-functional teams, including software engineers, to resolve complex technical issues and improve customer satisfaction
- Stayed up-to-date with the latest technology trends and advancements, continuously enhancing the quality and efficiency of all technical support services.

Education History

Professional Diploma in Software Engineering - Honors
Institution: NIIT
Year of Graduation: 2022

- Professional Diploma in Software Engineering (Honors), NIIT, Certificate received: April 2022
- Coursework: Software Developer, Web Developer, Server-Side Developer, Cloud Developer
- Created web application, mobile applications in teams with other students
- Lead my team in mobile development

Bachelor of Science in Computer System Engineering
Institution: University of Sunderland
Year of Graduation: 2023

- Bachelor of Science in Computer Systems Engineering, University of Sunderland, Expected Graduation: July 2023
- Coursework: Research, Product Development, Cyber Security, Android Mobile Development, Artificial Intelligence, Advance Data Technologies
- Wrote a paper on an Emotional speech recognition system, developed an insurance claim prediction, developed a mobile application with specified requirements, and am currently in my final semester
